MUHAMAD HAFIZ SAPUTRA

+628973869447 | muhamadhafizsaputra1@gmail.com | Linkedin | Github | Portfolio | Yogyakarta, Indonesia

Computer Science student at Universitas Gadjah Mada (GPA 3.59/4.00) and former Software Engineering Intern. I build full-stack web applications with Laravel, React, Next.js, and PostgreSQL, and deploy them with Docker on AWS EC2. Looking for a software engineering internship where I can build reliable, user focused systems.

Education

Universitas Gadjah Mada - Yogyakarta, Indonesia — Aug 2023 - Aug 2027 (Expected)

Bachelor's Degree Computer Science, 3.59/4.00

- Focus areas: Software Engineering.
- Participated in the KKN-PPM community service program at Desa Batur Tengah, Bali, leading initiatives for UMKM digitalization and collaborating on interdisciplinary environmental management projects.

Experience

PT Sinergi Informatika Semen Indonesia - Jakarta, Indonesia — Jan 2026 - Apr 2026

Software Engineering Intern

IT solutions provider specializing in Enterprise Resource Planning (ERP) systems and digital integration.

- Built a full-stack contract and employee monitoring dashboard with Laravel and React, used by 10 project managers.
- Refactored monolithic multi-table JOIN queries into modular correlated subqueries for contract value aggregation (OA, PO Spot, PO Call Out, Addendum).

Eduprima - Yogyakarta, Indonesia — Oct 2025 - Dec 2025

Coding Tutor

Provided private, foundational programming education and technical mentorship for children.

- Designed 12 lesson plans with MakeCode Python and Micro:bit for a young learner.
- Taught arrays and functions through 3 age-appropriate projects over 12 sessions.

Projects

- **Ekspedisi**: Digital outgoing mail management platform with Next.js and PostgreSQL, deployed on AWS EC2 with Docker Compose.
- **Teman Ibu**: Child growth monitoring and stunting prevention platform built with Next.js, TypeScript, Supabase, and Tailwind CSS.
- **Yogyakarta UMKM Directory**: Web directory with interactive Leaflet maps (React, Next.js) built for a web development competition.
- **Sky Grab**: A scalable cloud video downloader and media management built with Laravel, PHP, MySQL, Cloudinary API, Guzzle HTTP, and Docker.

Organisational Experience

Organisasi Mahasiswa Ahli TI UGM - Yogyakarta, Indonesia — Oct 2023 - Oct 2025

Back End Division Staff

- Completed back-end training covering APIs, authentication, deployment.
- Built Teman Ibu with Next.js, TypeScript, Supabase, and Tailwind.

Skills

- **Languages:** PHP, JavaScript, TypeScript, Java, Python.
- **Frameworks:** Laravel, Lumen, React, Next.js, Tailwind CSS.
- **Databases:** PostgreSQL, MySQL.
- **Cloud and DevOps:** Docker, AWS EC2, Git, Vercel.
- **Soft skills:** Problem solving, Communication, Leadership.
